

Information sheet

For Industries

Overview

TUMI is an international coalition assisting 20 global cities to create world-leading electric bus fleets in the next five years:

- The Transformative Urban Mobility Initiative (TUMI) is launching an international platform to accelerate adoption of electric buses in the Global South
- The TUMI E-Bus Mission will inspire and support 500+ cities to cumulatively electrify at least 100,000 transit buses

The Opportunity

- Work directly with transit agencies and fleet operators who are interested in procuring electric buses
- Receive expert technical guidance and support on:
 - Procurement and financing best practices
 - End-of-use best practices
- Network with local leaders and stakeholders on electric mobility, including transit agencies, regional government, NGO's and other leaders of industry
- Position and market your utility as a global pioneer in the electric mobility field

The Plan

- Advise the coalition on financial, technological and policy matters
- Commit to manufacturing for sales of e-buses and associated products/services in at least one city by 2023
- Participate in regional & global summits

About us

Funded by the German Federal Ministry for Economic Cooperation and Development (BMZ), a core group of organizations such as C40 Cities, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), the International Council on Clean Transportation (ICCT), the Institute for Transportation and Development Policy (ITDP), ICLEI – Local Governments for Sustainability, the International Association of Public Transport (UITP) and the World Resources Institute (WRI) will work together to accelerate the transition to electric buses in the Global South.
