

CHARGING THE ELECTRIC & DIGITAL MOBILITY FUTURE

TUMI *VOLT* CONFERENCE

21 May 2019
Leipzig
Germany

Let's bring together what belongs together! With the international high-level conference TUMIVolt, the Transformative Urban Mobility Initiative (TUMI) sets the scene: We build a new global market place for electric and digital mobility! Connecting mobility and energy providers, contractors, cities & urbanists, the public and private sector as well as investors and donors.

CONFERENCE OBJECTIVE

Connecting companies, leaders and experts from around the globe from the two sectors Energy and Mobility, to find future-proof and sustainable business cases is the aim of the TUMIVolt Conference. We offer the stage for a marketplace: Public decision-makers, manufacturers and donors working on and interested in e-mobility get to exchange their innovations, ideas and concerns. Together we aim to advance the development of investment and funding opportunities as well as new operating models and business entry points.

STRUCTURE

We're offering a pitching stage for short "food for thought"-input by selected speakers. Their input and further contributions on the matter are then taken to a marketplace and open for discussion to everyone. We're focused on a lively and inclusive dialogue that allows for the identification of matching points between cities, manufacturers, energy suppliers and donors looking to make urban mobility sustainable!
