The screenshot shows a white page on a dark blue background. At the top left is the FutureLearn logo. To its right is a breadcrumb navigation: Subjects ▾ Courses ▾ FutureLearn for business. On the far right are a search icon, a 'Sign in' button, and a 'Register' button. The main title 'Transformative Urban Mobility Initiative (TUMI)' is centered in large, bold, dark text. Below it, the word 'About' is in a smaller, bold, dark font. To the right of 'About' is a logo for 'tumi' in a stylized, colorful font (blue, green, yellow, red) with the full name 'Transformative Urban Mobility Initiative' in small text below it. The text under 'About' describes the TUMI initiative, mentioning its implementation by GIZ and funding by the German Federal Ministry for Economic Cooperation and Development (BMZ). It highlights TUMI as a leading global implementation initiative on sustainable mobility, formed through the union of 11 prestigious partners. The text ends with 'TUMI's vision is thriving cities with enhanced economic, social'.

Support

FutureLearn Course Modalities – All you need to know

Moderated*, self-paced** and free of charge

- All TUMI and partner courses are free of charge
- Select 'limited access' at the bottom of the course page***
- Complete the course within the standard time frame (e.g. 4 weeks)
- Enrollment is possible until the last day of the scheduled course run, entitling you to complete the course during the standard time frame
- Most courses are moderated and feature live-sessions (during the scheduled run time)

* Scheduled courses usually feature **live sessions with invited expert speakers**, as well as **interactive and moderated fora discussions**. Live sessions are being **recorded**; otherwise, all courses can be done **self-paced within the given time-frame**.

Purely self-paced courses can be done **anytime and allow for **limited interaction** with other participants.

***Future Learn offers a **non-mandatory paid subscription** model with extended platform access and further services.

Certificates provided by TUMI and GIZ

Digital Certificate by TUMI & GIZ

- Complete 100% of the course and upload a proof of completion
- For partner courses, please directly look into the course details or reach out to the course providers, in most cases certificates are being issued

Upload proof of completion (screenshot) and enter your personal data:

- Courses for which TUMI issues a certificate are marked with 
- To request your certificate follow this link: [Certificate Request Form](#)
- We kindly ask you to voluntarily consent to processing your data for internal monitoring purposes. This helps us in the further development of our learning offers.

Optional: Certificate issued by Future Learn:

- Requires a monthly subscription or one-off payment with Future Learn

Do you have any question? Please reach out to us:

Become part of a global capacity building movement for sustainable mobility!

- 1) Approach unique and free-of-charge **e-learning by world-class institutions** and experts
- 2) **Share information on learning opportunities** with your employees, co-workers, (co-)students, and friends
- 3) **Engage with us**, and support capacity-building for decision-makers and professionals worldwide

7 Theses: Towards Capacity Development for Sustainable Mobility

1. To tackle the current challenges of the sector we need **intellectual reform**, both in terms of professional education as well as the training curricula.

7. We have to **equip training offers with standards, norms, and planning processes** towards people-centered mobility.

6. We need to update and integrate the thematic education and training, teaching a **more comprehensive understanding of how traffic is generated and mitigated** as well as how sustainable transport systems are developed.

2. Existing curricula are **often outdated and too narrowly focused on free-flowing transport**.

3. There is a **high demand for more systematically developed capacity development programs**.

4. We need to establish consensus on **which tasks a modern mobility department can and should take on**.

5. There is a lack of knowledge on mobility in **related areas such as energy services, urban planning, spatial planning and economic development** as well as similar disciplines, at times rudimentary and often placed out of context.
